Recommendations & Key insights

Republican Party Dominance

^ Donald Trump consistently received high vote counts across three elections 2016, 2020, 2024.

^ Swing States shifted party loyalty between years.

Trump Votes

^ Los Angeles County remained the strongest supporter of Trump by vote count, (1.18M-2024).

- 🎯 Focus campaign resources on swing states with inconsistent voting patterns.
- 📦 Strengthen outreach in consistently loyal Republican counties to maintain high voter turnout.
- 🏠 Invest in voter engagement efforts in urban counties like Los Angeles.
- 👁️ Monitor counties with shifting behavior to identify early signs of future change.

What IF?

What if Trump had gained 2% more votes on swing states?

The electoral outcome might have shifted dramatically, especially in tightly contested elections like 2020.

Limitation & Data Gaps

-  Limited Fields: The dataset lacked demographic and socioeconomic data, which could have provided more in-depth analysis.
-  Data Inconsistency in 2024: In some counties like Texas, the winning candidate was marked as “Other Candidate” instead of Donald Trump, despite reliable sources confirming his victory.
-  Missing Contextual Data: The dataset didn’t include campaign events, voter demographics, or turnout motivations.
