# Recommendations

This Analysis shows clear trends in sales preferences, and peak traffic times.

Based on these insights, the following are recommended:

1–Optimize staffing and inventory during peak hours and high demand locations.

2–Focus marketing campaigns on top performing categories and customer preferences.

3– Boost underperforming products with targeted promotions.

4–Adapt promotions to match local customer preferences.

# Limitations

1–The data covers only the first half of 2023, which may not capture seasonal variations.

2– Customers feedback was not included in the data.

3– External factors such as market trends, holidays were not considered.
